Alexander DeMarco

Summerville, SC alex.demarco87@yahoo.com www.linkedin.com/in/ademarco87 843-964-8374

Portfolio of Work: https://ademarco87.github.io

Professional Summary

Software engineering graduate with experience in Java, Python, C++, and full stack web development, focused on secure coding and system reliability. Background includes 15 years in military and emergency services operating in mission-critical, time-constrained environments where accuracy, documentation, and accountability were essential. Seeking software, IT, or systems role supporting operational and defense-focused programs.

Security Clearance: Active Public Trust; previously held DoD Secret Clearance (last active 2018)

Skills

Languages: Java, JavaScript, Python, C++
Web / Backend: Node.js, Express, REST APIs, Angular
Databases: MongoDB, MySQL
Security: Authentication (JWT), encryption concepts, SEI CERT C++ standards
Practices: MVC architecture, modular design, Git/GitHub, Agile/Scrum

Education

Bachelor of Science in Computer Science: Software Engineering conc. Conferral date: 09/01/2025
Southern New Hampshire University – Manchester, NH

Relevant Coursework: Secure Coding • Software Reverse Engineering • Full Stack Web Development • Data Structures & Algorithms • Database Management • Software Design & Architecture • DevSecOps Principles

Projects

Secure Client Management System (C++): Refactored a legacy C++ client management application to improve modularity, scalability, and secure login functionality. Replaced hardcoded credentials with encrypted authentication using environment variables.

Travlr Getaways Web Application: Developed a full stack travel management website using Node.js, Express, and Handlebars for the client-facing UI, with an Angular SPA for administrative functions. Implemented RESTful APIs, authentication, and dynamic data rendering with MongoDB integration.

Animal Shelter Dashboard Application: Designed a secure, data-driven dashboard using Python, MongoDB, and Plotly Dash for visualizing and managing animal records. Implemented authentication, CRUD operations, and interactive charts for real-time insights.

Professional Experience

Interim Battalion Chief
Berkeley County EMS | Moncks Corner, SC 02/2026 – Present

- Provided command-level oversight for multiple field units, supporting daily operational readiness, staffing coordination, and incident escalation.
- Served as decision authority during time-sensitive operational issues, ensuring policy compliance, documentation accuracy, and continuity of service.

- Acted as liaison between field supervisors and senior leadership, translating operational realities into actionable information.

Paramedic Lieutenant / FTO 01/2022 – 02/2026
Berkeley County EMS | Moncks Corner, SC

- Supervised field operations and personnel in high-pressure environments, ensuring adherence to operational protocols and performance standards.
- Analyzed response data and documentation to identify trends, evaluate performance metrics, and implement process improvements.
- Coordinated complex emergency operations by developing response strategies, overseeing resource allocation, and directing field operations during critical incidents.
- Served as a Field Training Officer (FTO), onboarding and evaluating new providers, enforcing clinical and operational standards, and providing structured feedback to ensure readiness for independent assignments.

Tactical Emergency Medical Support (TEMS) Team Leader
Berkeley County EMS | Moncks Corner, SC 01/2024 – 03/2025

- Reestablished and led the county's TEMS program in coordination with law enforcement and command staff following an extended period of inactivity.
- Authored TEMS policies, procedures, and operational guidelines from the ground up, defining command structure, deployment criteria, and medical oversight.
- Provided command-and-control medical leadership during tactical operations, ensuring integration with incident command and alignment with law enforcement objectives.
- Advised and collaborated with other TEMS teams on program development and best practices and developed training standards that enabled sustained operational capability; the program remains active today.

Paramedic Crew Chief / EMT 03/2018 - 01/2022
Berkeley County EMS | Moncks Corner, SC

- Delivered advanced 911 emergency care by assessing injury and illness severity, implementing treatment protocols per clinical guidelines, and coordinating care with on-scene medical personnel to ensure optimal patient outcomes.
- Ensured timely and accurate completion of electronic patient records, meticulously documenting clinical interventions, patient assessments, and treatment plans to maintain compliance with regulatory standards.
- Conducted routine operational duties, including equipment maintenance, inventory checks, and facility sanitation, to ensure readiness of medical apparatus and work environments for emergency response.

Senior Healthcare Specialist 01/2010 – 12/2018
United States Army | Fort Hood, Texas

- Delivered medical support in high-risk operational environments requiring strict adherence to protocol and documentation.
- Coordinated field operations and evacuations in alignment with command objectives.
- Maintained accountability for $100K+ in mission-critical equipment and trained personnel on standardized procedures.

Other Education

Associate of Science in Healthcare Management July 2016
Kaplan University (now Purdue Global) – Online
